About Me

I'm a BTech Computer Science student starting from absolute zero and deliberately building real skills from the ground up. My long-term goal is to become a solo founder with strong reverse-engineering and problem-solving abilities—not just someone who knows theory, but someone who can take systems apart, understand how they work, and rebuild them better.

I focus on daily, incremental improvement and value discipline over motivation. I'm actively developing my technical fundamentals while training myself to think like a builder: questioning assumptions, validating ideas, and prioritizing execution over excuses. I'm early in the journey, but I'm serious about putting in the work and compounding progress every single day.

Education

2025 -28

SRKR Engineering college:

    Degree Program:

    Major: Computer Science & Engineering

    Specialization: Internet of Things (IoT), Cybersecurity, and Blockchain Technology

2022-2025

Vikas Group of Institutions:

    Diploma in Computer EngineeringVikas Group of Institutions | Vijayawada, Andhra Pradesh2022 – 2025
- Percentage: 77.11%
- Key Focus: Built a strong foundation in computer science principles, networking, and programming before advancing to B.Tech
